The LBJ P-Tech program is designed for students interested in a career in the healthcare industry. Our program provides students the opportunity to receive hands-on experience in the healthcare field through partnerships with Austin Community College and the Seton Healthcare Family.

P-Tech is for students in grades 9–14 who want to get a headstart in a career where skilled employees are in high demand. It is a six-year, career-focused program providing students with real-world work experience through internships in fields connected to their classroom studies. We partner with Texas Institutions of higher education and regional businesses and industry, giving students access to post-secondary education and workforce training opportunities.

ACC DEGREE PLAN

- General Studies in Pre-Health Sciences
- 4 Year Program/ 60 Credits
